

#IWDEV: Pi Traffic Lights

Circuit Diagram

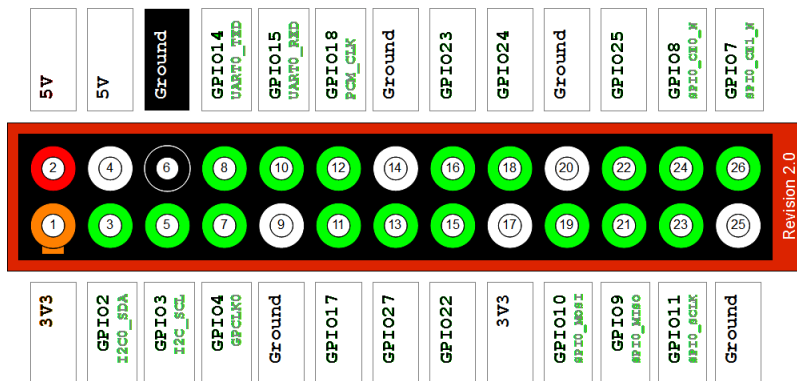

Component Pinouts

LED

ULN2003A

Raspberry Pi GPIO Header

To log in to a Pi

start either Putty (windows) or ssh (mac) and connect to port 22 on the pi.

Username : pi

Password: raspberry

```
cd ~/iwdev/Pi_traffic_lights_IWDEV
```

to run a python script that uses the GPIO port

```
sudo python <script name>.py
```

(sudo privilege is required to access the GPIO)

press Ctrl C to quit the script

edit text file nano <file name>

shutdown pi: sudo halt

Simple Http server (uses port 8000)

```
python -m SimpleHTTPServer
```
